023	SHOCK HAZARDS POWER TOOLS	Electrical Hazards	5	

Description
How to avoid these lifting problems.
Both the need for and the operation of GFCI.
Demonstrates the safe use of ladders and portable steps.
Demonstrates the techniques while calling for regular training.
Explains safe work practices.
Video on ergonomics.
Encourages employees to wear eye protection on the job.
Illustrates ways to prevent hazardous situations.
Reviews safety procedures for taking that first step down.
The opportunity for an accident is everywhere.
Prevent damage to buried utilities,.
Hand injuries are a major portion of accidents in today's workplace.
Safety is good business both for employers and employees.
Discusses office chair adjustment.
Proper first-aid procedures in treating thermal (high temperature) injuries.
Warns against taking these containers for granted; reminds us about their hazardous potential.
NONE
Observing the details of an accident and reporting it.
Improperly used or maintained power tools can injure or kill.

Video	TITLE	Subject	Time	Year
024	CHARGING UP ON BATTERY SAFETY	Power Tools	5	

Description
Batteries should be treated with respect and proper procedures.

047	ACCIDENT INVESTIGATION, THE BIG PICTURE	Accident Investigation	19	99

Description
Emergency action to take when a tire blows out.
Slag in the eye can be prevented with protective eyewear.
Treating victims of electrical burns can be a shock hazard to the rescuers.
Covers the signs of heat strokes and exhaustion.
Responsibility for safety lies with each individual.
Safety planning, consciousness all dreams could turn into nightmares.
Centers around first aid for head injuries.
Covers the basics of treatment of chemical burns.
Using abdominal thrusts to save a life.
Safe practices, using compressed air for cleaning, noise hazards etc.
Hand injury increases at the Acme Companies.
A quick reference guide to Hazardous Communications requirements.
Introduces the concept of matching the machine to the man.
Covers basic safety requirements of Bar-B-Q cooking.

Video	TITLE	Subject	Time	Year
048	THE SIGNAL CRANE SAFETY	Vehicles/Crane	6	

Description
The knowing and understanding hand signals for crane operation.

071	LIGHTING UP YOUR LIFE	Eye Protection	5	90

Description
Wearing proper hearing protection is "sound" advice.
The workplace are the emergency showers and eyewash units.
Dissects an accident and offers safety tips.
Offers tips on barricade safety, off and on the job.
Shows how important it is to keep accidents from turning into disasters.
Points out the dangers of not using child safety seats for children riding in motor vehicles.
Takes viewers on a journey through a Twilight Zone parody to stress consumer style riding mower safety.
Part two explaining that safety is a state of mind and emphasizes safety at home and on the job.
Describes procedures for recycling at home and at the office.
Shows what you can do to intervene if you or someone you know is chemically dependent.
The damaging effects of welding flash burns and prevention methods.
An engaging look at what you can do to save lives by properly maintaining your vehicles on and off the job.
Offers workers and safety officers guidelines in bringing contact lenses into the workplace.
Outlines procedures for safely removing lead paint.
How much light is too much or not enough? Safe lighting techniques.

Video	TITLE	Subject	Time	Year
072	MACHINE SAFETY GUARDS	Machinery	5	93

Description
Explains how machine guards work and offers safety tips to keep in mind.

093	TO STOP A THIEF	Vehicle Safety	5	
094	TRENCHING SAFETY I	Trenching-Shoring	0	
095	TRENCHING SAFETY II	Trenching-Shoring	0	

Description
Takes the viewer into a hurricane-prone plant and shows how planning pays off.
Takes a sobering view of fall protection.
Shows workers how to recognize the disease and simple preventive precautions.
Air power tools make a job easier, but as this video shows, they also can be dangerous if not handled with care.
Humorously covers safety tips the worker should follow to help prevent fall accidents.
Humorously covers safety tips the worker should follow to help prevent back pain.
The common causes of food poisoning.
Worksite noises can impair hearing and the threat of noise pollution is no longer a joke.
Basic overview of safety rules applicable to any crane use.
Supplemental oxygen supplies offer an additional first aid tool to those involved in emergency situations.
Underscores the need for proper hunter safety instruction before taking that first shot.
Parody of a live TV football broadcast humorously illustrates basic procedures in preventing dermatitis.
Provides some basic guidelines to follow to ensure a safe trenching job.
Part two re-emphasizing basic guidelines to follow to ensure a safe trenching job.

Video	TITLE	Subject	Time	Year
096	WHEN LIGHTNING STRIKES	Environment	5	92

Description
Ben Franklin visits the 20th century to learn more about lightning and lightning safety.

Description
Shows what can be done to reduce the chance of a heart attack.
Two surveyors encounter some unexpected hazards and learn valuable lessons in outdoor safety.
Emphasizes the total effort required of shippers, handlers, and carriers in safely handling a hazardous material.
Views OSHA guidelines for hazardous materials & emergency response tactics.
Responds to OSHA's mandate that employers provide PPE equipment and training to all employees exposed to chemical or physical hazards.
Motivates employee to recognize hazardous situations involving chemicals, wastes, and spills.
Operation, inspection and use of three kinds of respirators: APRs, SARs, and SCBAs.
Equipment worn to protect against chemicals hazards.
Stresses the use of selecting, handling, and moving drums.
Views physical hazards, possible injuries, and working safely.
Understanding chemical hazards and right-to-know information.
The awareness level, hazmat teams, and supervisory rules in an emergency situation.
Removal of contamination from workers and tools used in cleaning up hazardous materials, substances, and wastes.
Defines carbon monoxide poisoning and how to reduce the effects of this health hazard.
Three different videos presentations.
Discusses types of chemical hazards and reviews MSDS signs and label requirements.
Minimize this very real hazard by making informed professional decisions when encountering dogs.
Classroom Presentation
Program for hands-on maneuver skills.
Video , CD and instructor guide-Training package.

191	FIRE PREVENTION	Fire	5	93

Description
Offers solid tips on how to reduce the incidence of static electric sparks and their resultant damage.
Shows you how to "re-tire" without a disability.
Shows you how to "re-tire" with a disability.
Shows a simple 3-step procedure anyone can use to do their own analysis.
Shows you how to handle the ups and downs of lift truck operation.
Shows how you can avoid a run-in with a big rig.
Offers a humorous, step-by-step approach for dealing with automobile trouble safely.
Laws and their ramifications for today's workers.
Alerts the viewer to street robbery and offers tips to help prevention.
Examines the causes of falls and lists a few ways they can be avoided.
Hapless Hal learns a few important lessons about safety while working in these areas.
Reminds us to be aware of potential dangers during everyday activities.
Reminds both employers and employees to share an equal responsibility for making sure safety programs work.
Uses the nautical theme of a "Man Overboard!" to show how you can prevent needless injuries.
Shows what you can do to avoid the pitfalls of climbing.
Shows that just because a new workplace is unfamiliar, it does not have to be unsafe.
Shows how you can keep escape routes safe and exit safely in emergencies.

Video	TITLE	Subject	Time	Year
192	PREVENTING OFFICE FIRES	Fire	5	93

Description
Confined spaces are difficult to get into and out of and have the potential for a dangerous atmosphere.
Heavy equipment operators are responsible for the safety of the entire crew.
Your safety depends on knowing the hazards of workplace.
Trench shields are designed to protect workers from the hazards of underground work.
Trench shoring is often the only thing standing between you and a trench collapse.
Encourages the viewer to consider their commitment to safety in light of the impact an accident would have.
Illustrates message that each of us is responsible for the effect our actions have on others.
1. Deadliest Weapon In America. 30 min; 2. The Day I Died. 14 min; 3. So You Think You Can Drink N Drive. 20 min.
Shows what safety equipment to use, how to use it and when to use it.
Presents an accident in an industrial setting, demonstrates investigation techniques including site sketches.
Graphic accidents re-enacted; personal consequences of unsafe acts.
Powerful accident reenactments and dramatic consequences illustrated in this motivational video.
CEO of a major construction Company shows how to develop a zero accident program.
Responsibility for safety is ours; near misses are a signal for safety.
Seven shortcuts are a direct path to accidents.
Plant Manager learns having no serious injuries doesn't mean the work area is free from accidents.
Recognizes to avoid potentially dangerous critters by using caution, PPE and using skin protection.
The components of effective team building.
Discipline through explanation and enforcement of work rules.

Description
Ergonomics and VDT.
Safety and bottled gasses.
Blood borne pathogens and other issues for custodial workers. School setting.
Shows proper lifting techniques, lifting patients on straight-back chairs and backboards down stairways.
Shows how to prevent CTD's using proper posture, body mechanics, and other measures.
The video covers: What are CTD's causes and symptoms of CTD's, Ergonomic Job Hazard Analysis.
What are CTD's, causes and symptoms of CTD's, Ergonomic Job Hazard Analysis, Preventive Measures.
Video covers: How the back works, posture, effects of excessive weight and improper body mechanics.
Provides techniques for correction of unsafe conditions and changing unsafe behavior.
Public Works and many other occupations often use chain saws in tree trimming, landscape maintenance and bush control.
Covers how to prepare for meetings, lead effective discussions, capture audience attention and measure retention.

Description
Careless use of prescription drugs can be dangerous. "Drug busters" tells why we should take our medicine seriously.
Reviews regulations on guard rails, access ladders, and planking, part one of two videos. Test questions available.
Regulations on the hazards of mobile scaffolds and outriggers. Part two of two videos. Test questions available.
Power lines are like snakes - silent, but deadly. We are reminded that we need to be constantly aware of power lines.
The sources of some indoor pollution and a few ways to deal with the problem are explained in this video. Test questions.
A video tape and 7 lessons each can be handled separately.
NONE
Covers history of drug testing, overview of 49 CFR 382, alcohol and alcoholism, penalties to employers.
Fundamentals for the safe operation, pre-operation inspection and load capacity.
Covers the basics of what hazardous waste are and how to handle them.
Covers the basics of how to clean up and small amounts of hazardous waste.
Addressing aspects of traffic control common to contractors and public agencies.
Prevention measures that may be taken to avoid assault in the community.
Helps develop a plan to avert the tragedy, provides some signals of potential problems and a prevention program.

409	LIFTING SAFELY IN OFFICE ENVIRONMENTS	Office Safety	5	92

Description
Emphasis on averting and defusing an aggressive incident. Workbook and lesson plans available.
Shows the importance of a well balanced exercise program and suggests how to get started.
This program explains how a balanced diet is beneficial for improving your health.
Discusses what cholesterol is, the good, bad and shows it can be lowered by making the proper dietary choices.
Suggests ways to quit and discusses how Nicotine, Tar and Carbon Monoxide are hazardous substances.
Reviews basics of home chemical safety, planning for natural and chemical disaster.
Supervisors have responsibilities to assure worker safety.
Supervisors are required to train, document and enforce safe work.
Supervisors are responsible for what employees do or fail to do.
Training in safety must be conducted.
Describes these new vehicle features and offers important safety -related information regarding their use.
Discipline affects performance.
Safety audits review safety programs for effectiveness.
Fueling machinery is not the same as fueling your car.
Shoveling is lifting and many of the same techniques apply.
Review of operations on a backhoe and some safety principles.
Techniques for handling asbestos cement pipe.
You control injuries to your back thru good lifting techniques.
Good and bad aspects of handling chlorine.
How the back works effects lifting.

Description
Shows how to detect chemical hazards in the workplace.
The 16 part MSDS is required of all international companies.
Instructions regarding general responsibilities on ergonomics.
Designed to inform health and safety procedures.
AWARENESS of potential for violence, RECOGNITION of early warning signs, RECORDING incidents and encouraging
Focusing on tractor-loader backhoes, this program puts emphasis on safe operating techniques.
This video shows how these hazards are reduced by sloping, shielding and shoring.
Workers who may have incidental exposure to asbestos, OSHA Class III (Operations and Maintenance), and Class IV (Custodial or Maintenance).
Covers pre-operation check, site evaluations, safe distances, stabilizing and emergencies.
Good awareness video for tradesmen and maintenance staff to heighten awareness of issues, related to LOTO.
Good procedures guide to follow using LOTO.
Video reviews HIV-AIDS and Hepatitis B, causes, transmission, effects and precautions.
The right attitude will help us follow safe procedures. and simulated graphic injuries to show injury prevention.
Wear your eye protection, keep it clean and fit for use and wear the right kind of protection for the job.
Appropriate dress affects safety in the office and other work areas.
Most traffic accidents are caused by variations of several simple mistakes. Small vehicle version.
Effects of fatigue and similar on drivers.
Most traffic accidents are caused by variations of several simple mistakes. Truck version.
Purpose of JSA basics, JSA benefits, presented in "Safety Squares: format, a take off on the Hollywood Squares game show.
Protective clothing level A,B,C,D, reviewed in fashion show format.
Control of hazardous energy through locking out sources.

Description
Engineering principals, operator safety rules.
Reducing accidents in the workplace.
A 1940's private investigator who reports to work early and walks around the workplace detecting safety hazards.
Explains what CTS is and what employees can do to reduce the effects.
Hazards of Africanized honey bees (killer bees), wasps, and spiders. Covers how to avoid them.
A short humorous training video for flaggers.
Overviews of types of signs and barricades in construction sites.
Covers basic tools, electrical hand tools and more.
Supervisors have legal responsibilities to assure worker safety.
Overview of worker's comp. System. (Limited application to COSA but good information)
Aspects of office safety in humorous fashion.

Description
Cutting, grinding and sanding can be safe if you follow procedures and concentrate in the task.
Use the proper PPE. Never remove or disable safety devices on mowers. Inspect the mowing area for debris.
Handle the chemicals properly and constantly monitor the air quality in the confined space.
OSHA requires fall protection, make sure you have the right fall arrest system for the job.
Know how to work with chemicals with reduced risk of harm. Use proper PPE.
NONE
Assess the scene before entry as a first responder. Critique actions and make suggestions to improve the next response.
Know what to do if there's a fire. Know your evacuation route and its alternatives. Practice evacuation frequently.
Practice proper handling of flammable liquids. Practice proper extinguisher use and evacuation procedures.
Do not use a fire extinguisher unless you have been trained to do so. Use the PASS technique.
Understanding the hazards common to the chemicals you are working with. Follow the appropriate emergency proc.
Use the correct forklift for the job and location. If the forklift does not pass inspect., do not use it.
Always inspect the designated storage area. Stack materials properly. Follow proper storage techniques.
Loud noises can harm you in other ways. Hearing conservation programs are intended to protect you from hearing loss.
